

# Broadband Solutions

Building smarter schools, more productive businesses, and globally competitive communities

## Our Strategy

Our successful municipal projects include fiber-based regional Open Access systems and gigabit-to-the-home models, which are both developed around self-sustaining principles and not reliant on local taxpayer funds. These projects are typically funded by grant programs and/ or private investment

## Our Skills

- Assessment
- Evaluation & Planning
- Funding
- Design
- Utility administration
- Project management
- Operational management
- Network monetization

## Our Story

ECC Technologies is a full-service technology and communications consulting group providing specialized services to our investor-owned and municipal customers for more than 25 years. ECC is a leader and pioneer in the development of Broadband and technology programs nationally and has developed greater than \$3 Billion in programs across the US supporting both private and municipal initiatives.
