

What's New!

Franklin County NY Selects ECC to Provide On-Call Broadband Data, Planning, GIS, and Engineering Services

Key Benefits of the Partnership

Improved Connectivity: Residents and businesses in Franklin County can look forward to improved connectivity, which is essential for remote work, online education, telehealth, and various other aspects of daily life.

Economic Growth: Access to reliable broadband services can stimulate economic growth by attracting businesses to the area and enabling local entrepreneurs to thrive.

Enhanced Quality of Life: Franklin County residents will experience an enhanced quality of life, with the ability to access entertainment, information, and essential services online.

Digital Inclusion: The partnership with ECC Technologies helps bridge the digital divide, ensuring that no one is left behind in the digital age.

Scalability: The on-call nature of the contract allows for flexibility and scalability, ensuring that the county can adapt to evolving connectivity needs.

Saratoga County NY Selects ECC to Conduct a Broadband Feasibility Study

The Feasibility Study: What to Expect

Assessment of Existing Infrastructure: ECC Technologies will evaluate the current telecommunications infrastructure to identify strengths and weaknesses.

Mapping Areas: Identifying areas within the county that lack adequate broadband coverage is crucial. ECC Technologies will create detailed maps to pinpoint unserved and underserved communities.

Technology Evaluation: The study will explore various broadband technologies to determine the most suitable options for Saratoga County's unique geography.

Cost Estimation: ECC Technologies will provide a cost estimation for implementing broadband infrastructure improvements, including potential funding sources and grants.

Community Input: Gathering input from residents, businesses, and local stakeholders to ensure that the broadband solutions align with the community's needs and aspirations.

About us

WHO WE ARE

ECC Technologies was incorporated in 1995 to provide technology and communications consulting services to Educational, Community, and Corporate (ECC) clients. This was at the time when the nation's telecommunications industry was changing drastically through deregulation.

For the past several decades, ECC has provided technology, broadband, and security consulting services to education, municipalities, government, and corporate clients.

ECC continues our mission to assist clients with the expansion of broadband and the implementation of technology and security solutions in communities to improve economic development, public safety, education, and health-care services

Success Stories – ErieNet Sales, Marketing, and Operations Support

About

The 400-mile network backbone will connect all viable municipal entities, as well as key community anchor institutions (CAIs), such as business, educational, and healthcare entities. In addition, the network will be available to any viable entity in Erie County that wishes to subscribe to the network.

ECC Technologies conducted the initial study for the open-access network on behalf of Erie County in 2017. We also developed the business plan in which Erie County will operate the nearly 400-mile middle-mile fiber-optic network.

"Our firm is now 100% accountable for the success of this project," - ECC Technologies Vice President Matthew Crider.

"This is a significant undertaking for the county," said ErieNet Chairman Thomas Baines. "I think the outcome is really what's most important."

How to get connected

If you would like to learn more about the network and how to get your community connected contact Ty Rizek at:
